

# Shashank Gupta

---

BASIC INFORMATION	<b>Graduating:</b> December 2017 <b>Visa Status:</b> F1 Student (Eligible for OPT) <b>Citizenship:</b> India	sgupta96@illinois.edu (+1) 217-904-6006 <a href="https://shatu.github.io/">https://shatu.github.io/</a>
EDUCATION	<b>University of Illinois at Urbana Champaign</b> Master of Science, Computer Science <b>Thesis Adviser:</b> Prof. Dan Roth <b>Birla Institute of Technology and Science, Pilani, India</b> Bachelor of Engineering (Hons.), Computer Science	<b>Aug'15 – Dec'17</b> <b>3.83/4.0</b> <b>Aug'08 – June'12</b> <b>3.42/4.0</b>
RESEARCH INTERESTS	<b>Natural Language Processing:</b> Question Answering; Dialogue Systems; Abstractive Summarization; Language Generation; (Sent./Doc.) Representation Learning. <b>Machine Learning:</b> Deep Structured Models; Deep Generative Models; Distributed ML; Deep Reinforcement Learning, Model Interpretability & Adversarial Attacks.	
TECHNICAL SKILLS	<b>Languages:</b> <i>Proficient:</i> Python, Java   <i>Basic:</i> C, C++, SQL, HTML/CSS, JavaScript, JSP/Servlets <b>Toolkits:</b> Tensorflow, Hadoop, Pig, CogComp-NLP, Illinois-SL, Matlab, LaTeX	
PUBLICATIONS	<b>Shashank Gupta</b> , Varun Chandramouli and Soumen Chakrabarti. “Web-scale Entity Annotation Using MapReduce”. In: High Performance Computing ( <b>HiPC</b> ), <b>2013</b> <a href="#">[PDF]</a>	
RESEARCH EXPERIENCE	<b>Research Assistant:</b> <ul style="list-style-type: none"><li>• <b>UIUC:</b> Cognitive Computation Group <span style="float: right;">(Aug'15 - Present)</span> <i>Themes: Unsupervised Text Classification; Text Generation; Structured Learning</i></li><li>• <b>Max Planck Institute (MPI)</b>, Databases &amp; Info. Sys. Group <span style="float: right;">(Aug'14 - April'15)</span> <i>Themes: Named Entity Disambiguation; KB Construction</i></li><li>• <b>IIT-Bombay:</b> InfoLab <span style="float: right;">(Jan'13 - June'14)</span> <i>Themes: Entity Search &amp; Disambiguation; Distributed Training and Indexing</i></li><li>• <b>Yahoo Labs:</b> Ad-Predict Team <span style="float: right;">(June - Dec'12)</span> <i>Themes: Display Ad-Platform; User-Response Prediction</i></li><li>• <b>Yahoo R&amp;D:</b> User Data &amp; Analytics Team <span style="float: right;">(Jan - June'12)</span> <i>Themes: Search Ad-Platform; User-Response Prediction; Automated Account Optim.</i></li></ul>	
TEACHING EXPERIENCE	<b>Teaching Assistant:</b> <ul style="list-style-type: none"><li>• <b>UIUC:</b> Machine Learning, CS446 <span style="float: right;">(Aug - Dec'16)</span></li><li>• <b>IIT-Bombay:</b> Web Search and Mining, CS635 <span style="float: right;">(July - Nov'13)</span></li><li>• <b>BITS-Pilani:</b> Operating Systems, CS C372 <span style="float: right;">(Aug - Dec'11)</span></li></ul>	
RECENT PROJECTS	<b>Unsupervised Text Classification</b> <span style="float: right;">(Aug'15 - Present)</span> <i>Guide: Prof. Dan Roth, UIUC</i> <a href="#">Web</a> <ul style="list-style-type: none"><li>– Key idea is to embed documents &amp; topics using World Knowledge, and then compute similarity.</li><li>– Developed new topic-sensitive word and entity embeddings by augmenting the Word2Vec loss, and used their composition to represent documents.</li><li>– Identifying the need to learn the composition itself, modeled it as a One-shot Topic Classification problem using Distant Supervision from Wikipedia.</li><li>– An empirical study of architectures revealed the importance of hierarchical modeling &amp; attention.</li><li>– Currently using VGG-style networks with skip connections to learn topic-sensitive document embeddings from Wikipedia, where the Wikipedia categories are the labels.</li></ul> <b>Conditional Text Generation</b> <span style="float: right;">(Jan - May'17)</span> <i>Guide: Prof. Svetlana Lazebnik, UIUC</i> <a href="#">Web</a> <ul style="list-style-type: none"><li>– Experimented with Conditional GANs and VAEs for sentiment-conditioned review generation.</li><li>– Experimented with both Policy-Gradient and Gumbel-Softmax, and used Curriculum Learning with a conditional language model to bootstrap the GANs.</li></ul>	

	<b>Joint NER, Relation Extraction and CoReference Resolution</b> <span style="float: right;">(Jan - May'16)</span> <i>Guide: Prof. Dan Roth, UIUC</i> <span style="float: right;"><a href="#">Web</a>   <a href="#">Github</a></span> <ul style="list-style-type: none"> <li>– Aim was to try out joint modeling of NER, Relation Extraction and CoRef with constraints.</li> <li>– Simple coupling of classifiers without constraints showed poor performance.</li> <li>– Developed a framework for joint training with Constrained-Conditional Models, using Illinois-SL and CogComp-NLP.</li> </ul>
PAST PROJECTS	<b>Agile NERD for KB-Lifecycle</b> <span style="float: right;">(Aug'14 - April'15)</span> <i>Guide: Prof. Gerhard Weikum, Prof. Denilson Barbosa, MPI</i> <span style="float: right;"><a href="#">Web</a></span> <ul style="list-style-type: none"> <li>– Identified the problem of separating mentions of emerging entities from mentions worthy of abstention as the key hurdle in achieving real-time KBs and iterative entity annotation on corpus.</li> <li>– Used the disagreement between an ensemble of annotators to signal abstention on a given mention.</li> </ul> <b>Scalable Entity Disambiguation and Search</b> <span style="float: right;">(Jan'13 - June'14)</span> <i>Guide: Prof. Soumen Chakrabarti, IIT-Bombay</i> <span style="float: right;"><a href="#">Web</a>   <a href="#">Publication</a>   <a href="#">CSAW</a></span> <ul style="list-style-type: none"> <li>– Designed a scalable entity annotation and indexing framework in Hadoop. Designed custom-key partitioning strategies to mitigate the load-skew problem of a simple MapReduce implementation.</li> <li>– Improved the accuracy of the entity disambiguation system by extracting more training data from Wikipedia and engineering features.</li> <li>– Developed hadoop-based solutions for distributed training of millions of models.</li> </ul> <b>User Response Prediction for Non-Guaranteed Display Ad Delivery</b> <span style="float: right;">(June - Dec'12)</span> <i>Guide: Prof. Sanjay Chawla, Prof. Shivaram Kalyanakrishnan, Yahoo Labs</i> <span style="float: right;"><a href="#">Web</a></span> <ul style="list-style-type: none"> <li>– Improved the accuracy of the user-click prediction model by mining new features.</li> <li>– Analyzed Petabytes of data for feature signal &amp; coverage.</li> <li>– Used that analysis to find a training data partitioning strategy that showed promise when different models were trained on those different partitions.</li> </ul> <b>Automated Campaign Optimization for Search Advertising</b> <span style="float: right;">(Jan - June'12)</span> <i>Guide: Ajay Sharma, Director, UDA, Yahoo R&amp;D</i> <span style="float: right;"><a href="#">Web</a></span> <ul style="list-style-type: none"> <li>– Prototyped a tool that automated the account optimization for advertisers.</li> <li>– Developed models for predicting #impressions, #clicks, #conversions, and handled sparsity issues by using community detection algorithms to cluster competitors together.</li> <li>– Ultimately, given a budget, the tool used resource allocation algorithms to select appropriate bid amounts for various targeting combinations.</li> </ul> <b>Web Search Personalization on the Client-side</b> <span style="float: right;">(Aug'10 - Dec'11)</span> <i>Guide: Prof. Mangesh Bedekar, BITS-Pilani</i> <span style="float: right;"><a href="#">Web</a></span> <ul style="list-style-type: none"> <li>– Prototyped a browser extension that modeled the user intention and re-ranked search results on the client-side.</li> <li>– A neural model was learned to identify useful pages from user's browsing history using user's browsing patterns as features.</li> <li>– Those pages were then used to build a user profile over time, which was ultimately used to personalize the search results on the client-side.</li> </ul> <b>Online Comprehensive Examination Software</b> <span style="float: right;">(May - July'10)</span> <i>Guide: P.B. Kotur, Director, Talent Transformation, Wipro InfoTech</i> <span style="float: right;"><a href="#">Web</a></span> <p>Developed a Subjective Online Examination application using JSP and Servlets.</p>
